A Message from Admin

Welcome to the February 2013 edition of the UKDN WORD magazine. Inside this issue are the full results of our Coin and Artefact of the Year 2012 polls with pictures of all the finds; Let's hope 2013 is as good to us.

We say welcome to two new banner sponsors on the forum this month, as Crawfords and Mike Longfield Detectors have joined those already here. Just click on their banners to link to their websites. We have created a new forum section called "On-Going Research Projects", where those doing research on certain artefact or coin groups can apply to admin for a new topic to be opened. Here they can ask for details of finds that may help their studies. Thanks to all those that have helped already and allowed images to be used on others' web sites. Please have a look in and see if you too can help.

It seems that the whole country has been praying for better weather recently and at least some chance to go out detecting again. Fields have either been rock solid and frozen, covered in inches of snow or too wet and boggy to even walk on. A bit of respite has come along with some milder weather, but it's still very wet out there. Please remember that the farmers are having it really tough too right now and might not be at their most receptive!

We are still asking for all you budding photographers to capture some great images for us to use as magazine cover pictures or for our 2014 calendar. We are looking for pictures from all the seasons so show us your creative sides and post up your best photos. Finally, welcome to all our new members and to all those starting out in the hobby. If new, then please read all the information in our newcomers section and ask anything you like on the forum. There are nearly 6000 members all happy to help!

£295.26 Donated to Macmillan Cancer Support

After a very successful Christmas Deus Raffle Draw we took out the cost of postages and raffle tickets etc and discovered we had an amazing £295.26p left over. Earlier we had ran a poll on the forum so that you, the members, could choose the charity to which any excess funds would be sent. You chose Macmillan Cancer Support and a cheque was sent. The confirmation receipt is reproduced on Page 6 of this magazine.

Well done to everyone who took part.

New Section Created i.e. On-Going Research Projects

Some weeks ago we moved the various research projects we have running on UKDN into one specific area, a new one entitled "On-Going Research Projects". Within this area you will now find studies such as Livery Buttons and Roman Seal Boxes, both by Kev Woodward, Early Military Buttons by Blue_yeti, Lead Bag & Cloth Seals by StuE, Pilgrims Amuplla by Tom Redmayne, Long Cross Coinage by Steve Rice and the Romanesque Chapes Research Project. See it at the link below

Coin of The Month

Winner - Kopparberg Ambiani gallic war uniface stater

I have only been detecting since february 2012, I joined a couple of online detecting forums. I answered a post that was asking for new members to join a local club.

I got chatting to a forum member, Yeti, and since then we have spent a number hours out in the fields. Some of those on pasture, some on Plough.

On the day in question Sunday 22nd December. We decided on Pasture as all the ploughed ground was too wet.

We decided to do an area we'd not done before. It all started as normal a few shottie caps, buttons and foil not much to note really

I suppose we had been scanning for about an hour when we stopped and had a chat, discussing the features of this pasture, which had a small rise in the ground. I said "I'm heading that way" yeti agreed.

(Continued on page 10)

MONTHLY COMPETITIONS

(Continued from page 9)

It looked a likely spot so off we headed, detecting on the way. Yeti, who covers the ground a bit quicker than me, got there first and was working an area.

I slotted in and we were working towards each other when i got a signal between 16/17 with a low tone on the etrac, using conductive sounds. So I started to dig it out.

Nothing in the first spade full so I went in again. I lifted out the next spade full and caught sight of what at I thought at first was a gilded button, as it was plain side up. I plucked the object out of the soil and turned it over to see the other side.

"This is no button, its a gold coin" I got to my feet and lost the plot. Yeti must've thought what the hell is a matter with him, as I ran the few yards to him and did a knee slide!

"Look at this look at this" I yelled. I don't think you can print what he said at first. What a rush of adrenalin I got, it took me ages to calm down and weeks before i stopped smiling.

The farmer has been informed and it will be recorded with the FLO at my local club meet at the end of January. "Yeti my mate" lets hope we can get you one soon

Artefact of the Month

Winner - DONNYDAVE Gold ring, age uncertain

I had always wanted to detect in this area just at the side of an old Roman road and not far from a known Roman Fort.

So when Yorkshire Searchers announced an open dig I jumped at the chance. We all met up at a nearby pub car park and when everyone had arrived we moved about a mile down the road and parked up in a line on the farmers access lane.

We had been told by the farmer that his land was undetected but we soon found out it had actually been well detected by a local club, and also it had local resident detectorists that had been on here for years. So it was no surprise when hardly anything was coming up.

After about an hour I had found one button, and when I looked up everyone had moved off to another field.

(Continued on page 12)

MONTHLY COMPETITIONS

(Continued from page 11)

I decided to go back to my car for a drink of water, then move off towards the entrance to the farm off the main road.

I started getting signals from tinfoil, and pieces of coke and I thought to myself if the next signal is coke I will move to the next field.

What a surprise when it turned out to be an ornate gold ring. I walked up to the event organiser, who seemed just as surprised as me, I don't think much at all came up that day and I think I had the best find without a doubt.

It has been reported to the FLO and it is thought to be Roman but I will inform everyone when a positive ID is available.

Donnydave.

Fair Sites of Scotland by Brian Cross

Written by UKDN Forum Founder Brian Cross this book researches all the Cattle, Sheep and Horse fair sites in Scotland.

It is an excellent research tool for any detectorist intent on discovering some of these highly productive metal detecting sites.

Originally sold for £6.50 + postage Brian is offering these books to UK DETECTOR NET for a one-off price of £6.41 including postage and PayPal fees.

HERITAGE CRIME

What are heritage crimes?

Heritage crimes are, first of all, offences that damage the historic environment – so things like vandalism, graffiti, arson and theft.

Why should the public care about heritage crimes?

Heritage crimes are criminal activities, which can have serious effect on neighbourhoods and society.

Things like arson, graffiti, and criminal damage scar beautiful buildings. Anti-social behaviour such as substance misuse debase the places we live and enjoy visiting; theft and illegal metal detecting take away the physical evidence valuable to our understanding of the past. On top of that, all of these can incur financial loss on property owners.

If heritage crimes are not tackled better we all stand to lose something of our history and well-being.

How serious are these crimes?

There is **no national statistics on heritage crime** by the police so the true extent is difficult to ascertain. Through our work in the regions and our experience with many sites across the country, we know the crimes are widespread and they tend to be under-reported by victims.

A recent assessment identified that arson, architectural theft, removal of artifacts from protected sites and vehicle nuisance pose the greatest threat.

Illegal metal detecting in Lincolnshire is growing and reported cases are only the tip of the iceberg.

The level of **metal theft** is also of great concern.

- In 2005, there were 84 metal theft claims from churches totalling £325,326. In 2010, this has soared to 1763 claims costing £3,310,488 (data from Ecclesiastical)
- In 2010 Manchester diocese tops the list of metal theft claims with more than 90 claims recorded up to the end of November. It is closely followed by Lincoln, with more than 70 claims

Our understanding of the volume and extent of crime in the historic environment continues to develop. Neighbourhood Policing and local involvement will contribute considerably to gathering intelligence and data on the ground. We will also be developing systems that will allow us to accurately record crimes and ASB and thereby place our resources in the right place at the right time.

For crimes in progress - call 999

More action, less crime. It all adds up.

For crimes that have happened - report to your local Police

UKDN aims

UKDN is a forum for people who are interested in the hobby of metal detecting. UKDN is an online community where members can exchange and share knowledge, their views, discuss the hobby, their finds, the machines they use and a million and one other detecting related subjects. UKDN actively works towards the following aims:

1. Develop a greater understanding of the hobby and some of the wider issues through healthy pro-active debate within the forum and through the monthly magazine, which is distributed to, and read by, our membership and beyond. The magazine includes UKDN based news and articles, as well as wider news, debate, and issues of heritage interest.
2. Provide a platform to inform beginners in the hobby of the basic principles in the use of a metal detector, gaining permission, site research, basic heritage law, farming scheme rules and in the 'best practice' for conservation, recording and co-operation.
3. Actively promotes the 'Code of Practice for Responsible Metal Detecting' to all members of the UKDN online forum and beyond.
4. Encourage all UKDN detectorists to record their finds with the appropriate bodies (depending where they detect); In England and Wales, this is with the Portable Antiquities Scheme, in Scotland this is the Treasure Trove Unit.
5. UKDN will actively work towards ensuring the future security of the hobby. We will liaise and co-operate with heritage professionals in a way which is mutually beneficial to all parties whilst maintaining our independence, and we encourage their active participation, either in the UKDN online community or through our on-line magazine.
